# APPENDIX A

## FITTING OF LEGEND/IDENTIFICATION

A standard sheet of legends are supplied which may be used for the engineering units being displayed. The selected legend should be carefully cut from the overall sheet, marked with any appropriate plant tag or identification, and pushed gently into the slot provided in the bottom right hand corner of the front panel of the instrument (see drawing below). These legends may be subsequently removed by means of a sharp pin in the notch provided.

The Legend sheet is included with the instrument.
